

Practice Mental Addition with these cards.

What's the sum shown below?

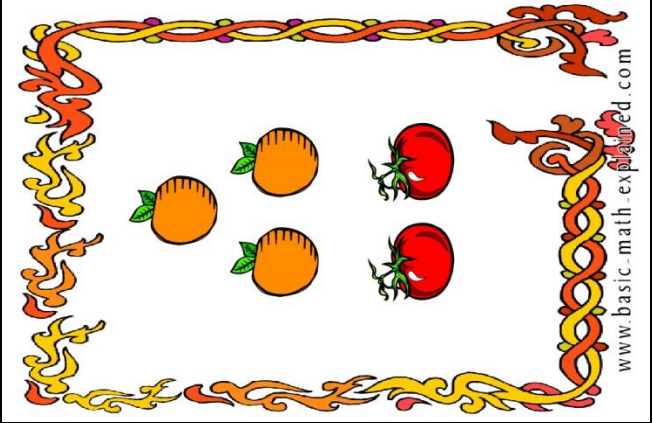

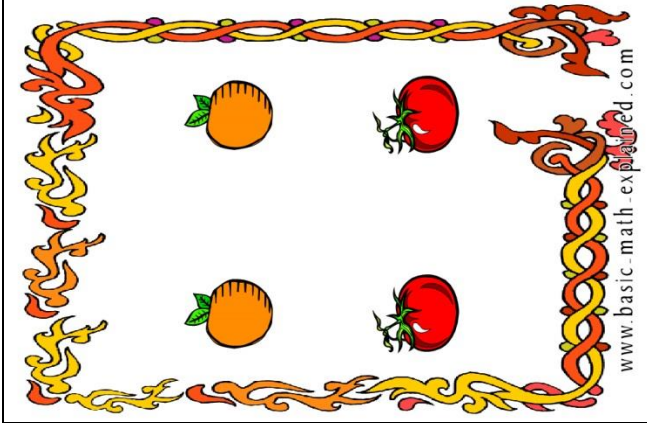

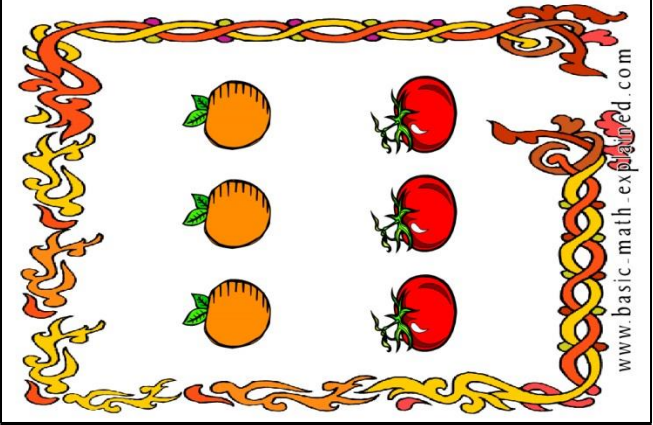

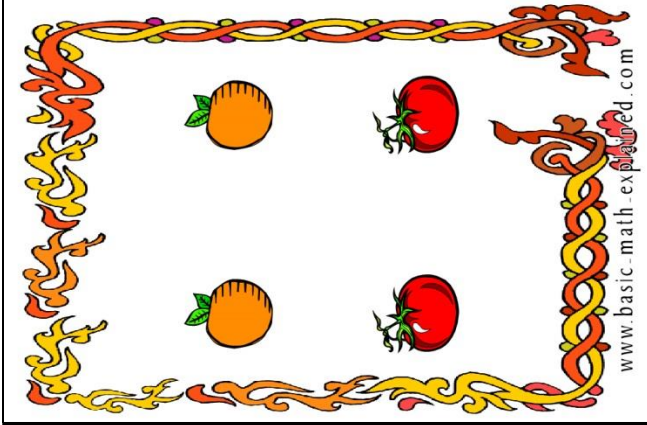

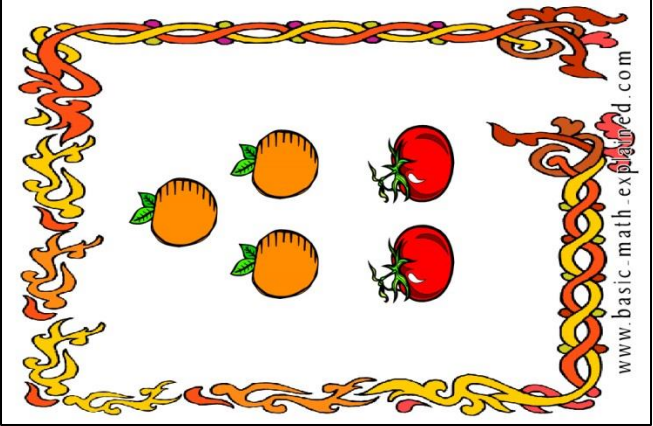

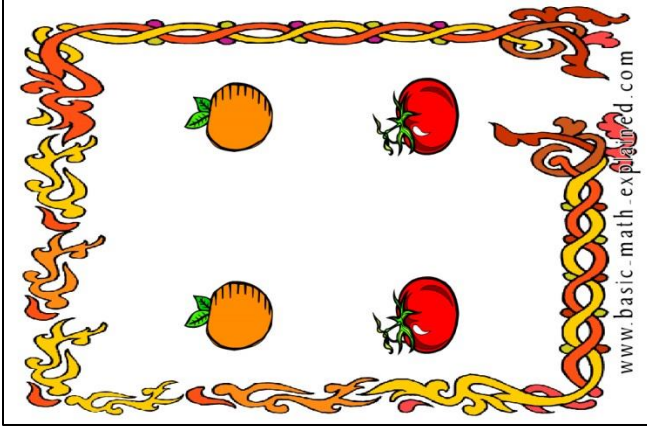

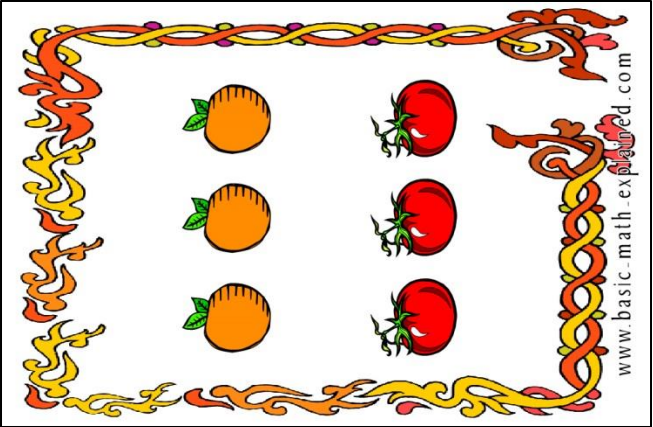

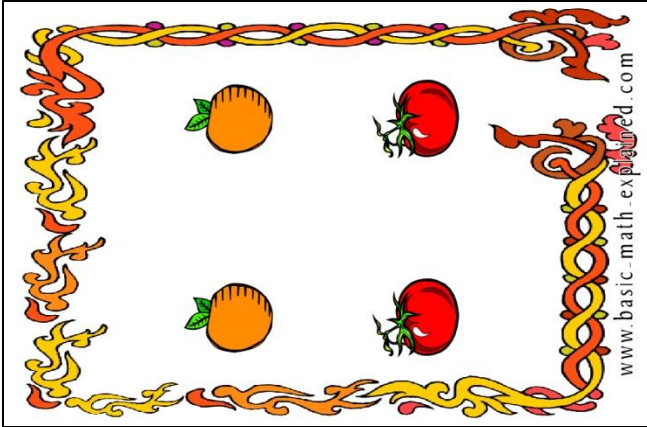

How fast did you get the answer?

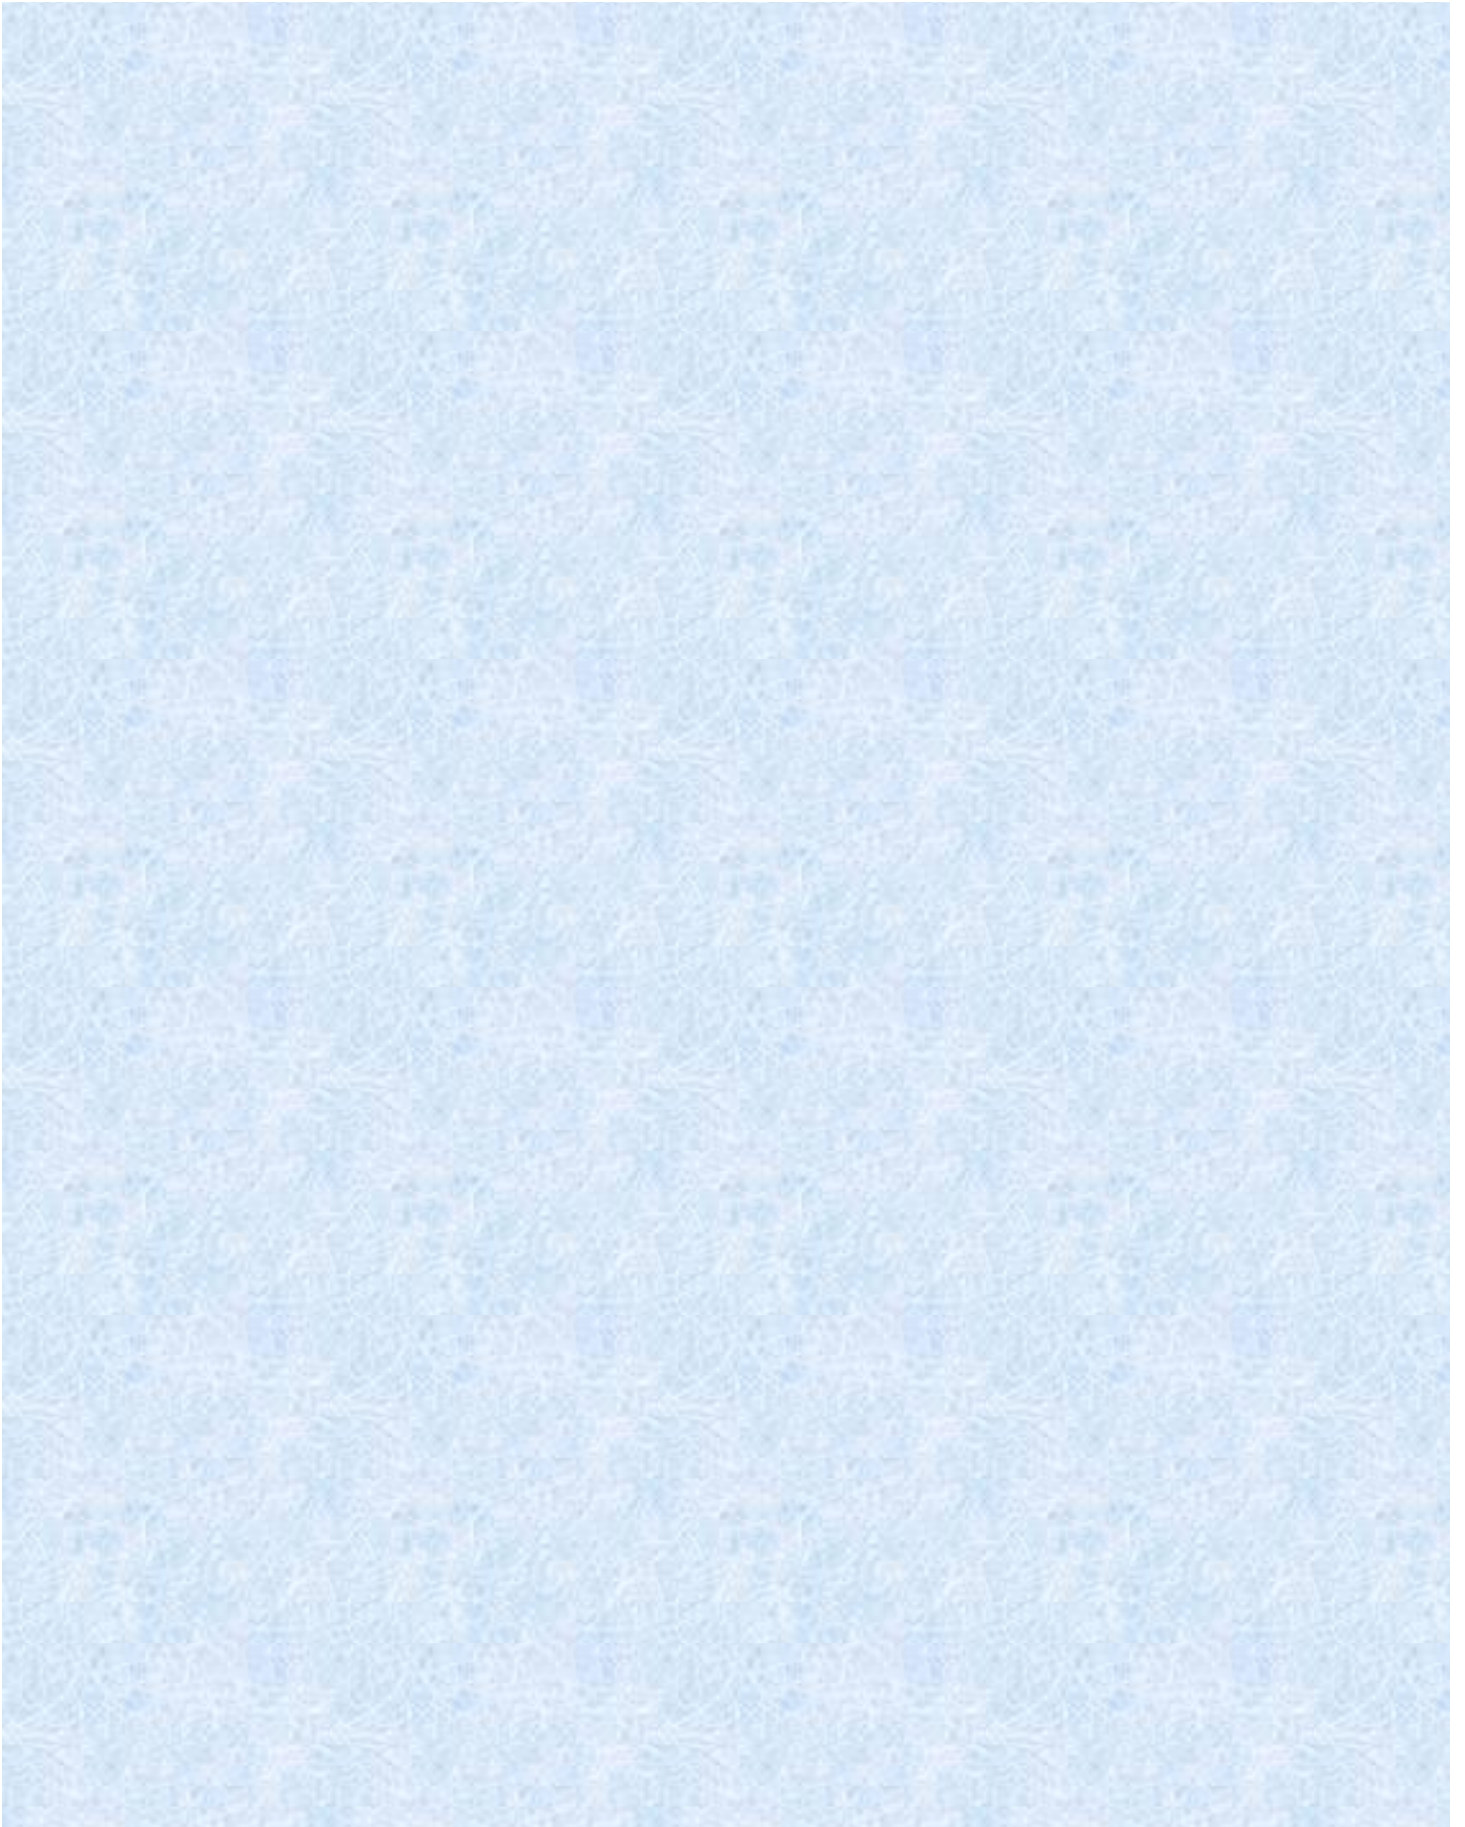

Did you notice the middle cards

6 and 4 makes 10?

Print and cut out 6 copies to make a deck of 48 cards.

Print this at the back of the cards

Addition Game Challenge

1. Shuffle the cards and deal them all out to all the players.
2. Players place their cards in a stack face down in front of them.
3. Every player opens their top card at the same time.
4. The first player to call out the Total wins all the cards.
5. If 2 or more players call out the answer at the same time, the cards are divided equally among them.
6. Left over cards are added to the next play and must also be included in the total.
7. Keep playing till one player runs out of cards. That is the end of one round.
8. Record the number of cards each player won at the end of that round. One card equals one point.
9. Start over for round 2.
10. The first player to get over 50 points is the winner.

Memory Game

1. Shuffle the cards.
2. Spread all the cards face down on the table.
3. First player turns 2 cards face up so all players can see them.
4. If the 2 cards are an exact match, the player takes the cards and opens 2 more cards.
5. If the 2 cards do not match, the player turns them back face down. The cards must remain in their original place.
6. The turn passes to the next player.
7. The game is over when all the cards have been taken.
8. The winner is the player with the most cards in the end.
